

Missouri Valley JATC & IBEW L.U. 2 Training Course: Trenching & Excavating Competent Person, Confined Space Rescue Course

The trenching and excavations competent person course will educate the learner on how to safely work in and around open trenches, excavations, and also work in confined spaces. The course will review the 1926 subpart P standards through illustration and discussion. The confined space rescue course pairs well with this full day class as you learn the hazards and mitigation needed to safely work in a confined space and potentially conduct a rescue. (Rescue Proficiency not Included in course)

Trenching & Excavation Course

- Definitions surrounding 1926 Sub. P
- OSHA requirements of a "competent" person.
- General hazards, dangers, and exposures found at the worksite. How to implement corrective actions.
- Soil Testing & Classification
- Requirements for protective systems.
- Types of Sloping/Benching/Shoring/
- Inspection requirements

Confined Space Rescue Course

- Definitions pertaining to confined spaces.
- OSHA requirements of an "Entry Supervisor".
- Hazards related to working in a confined space.
- Safety requirements for proper entry.
- Permit checklist overview.
- How to ensure a proper rescue plan is in place.
